

# What should your financials tell you?

- Most people look at their financials to see if they made any money so that they can worry about how much taxes they might have to pay
- Financials should tell you how you're managing your business AND
- If you're making enough money to operate AND
- If you're making enough money to replace the trucks that are dying
- If you're making enough money to establish a rainy-day fund
- If you're making enough money to fund future growth

Financials are one tool to measure how well you're on track to accomplish your goals.

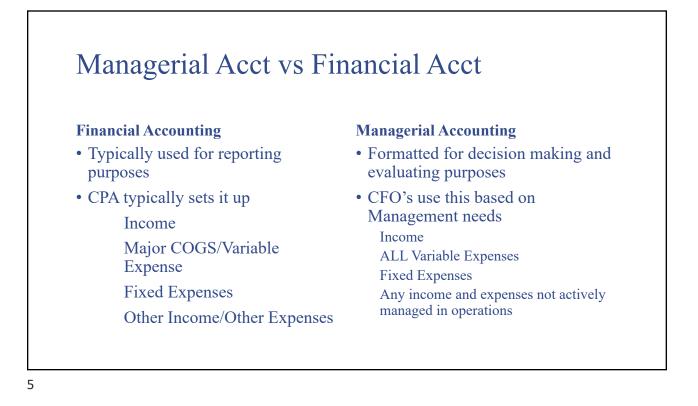

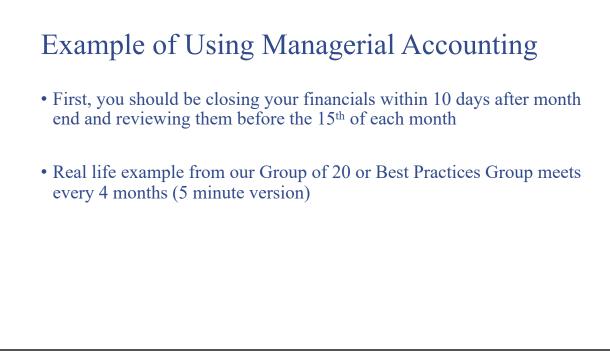

### Company Growth requires Personal Growth

Just as a driver that goes from a quick snatch to a flatbed to a medium duty to a heavy duty to a rotator, he/she must learn new skill sets...

As an owner, you must learn new skill sets as your company grows, such as management skills, HR skills, training skills, time management skills and financial skills

My Goal for Today: Help you learn at least one new skill so that you can better utilize the tool of Managerial Accounting

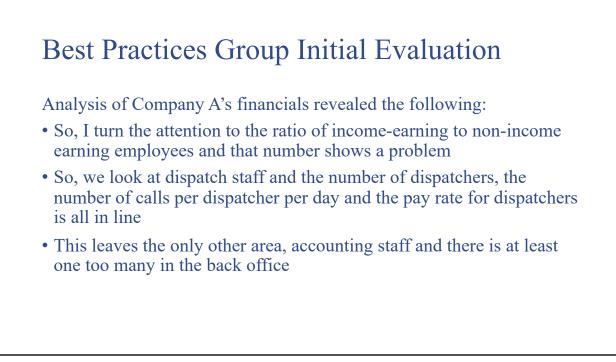

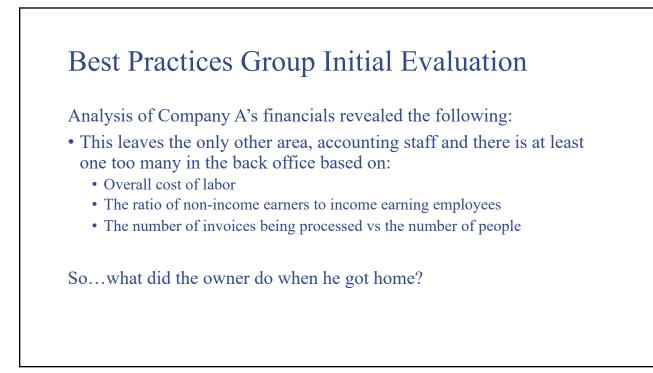

# Best Practices Group Initial Evaluation

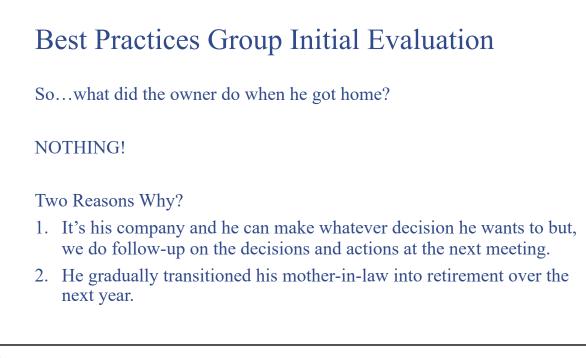

Analysis of Company A's financials revealed the following:

- Debt and depreciation had increased without the number of trucks increasing indicating they had replaced a truck
- Profitability was low, but all expenses seemed to be in line, except:
- Wage expense was high, so I drill down
- Driver pay is in line, number of calls per driver per day is in line, so we know its not a driver issue

# Best Practices Group Initial Evaluation

How Managerial Accounting works:

You evaluate financials and along with other critical data to find problems aka opportunities for improvement

Then you make a decision or a plan for change

Evaluate the impact of that change, then make another decision

THIS is how you should be using your financials!

11

# First Requirement of Using Financials

# Having **READABLE** financials

# Revenue / Income / Sales

| Income               | Location A | Location B | Location C |
|----------------------|------------|------------|------------|
| Light-duty Revenue   | \$         | \$         | \$         |
| Medium-duty Revenue  | \$         | \$         | \$         |
| Heavy-duty Revenue   | \$         | \$         | \$         |
| Road Service Revenue | \$         | \$         | \$         |
| Transport Revenue    | \$         | \$         | \$         |
| Total Income         | \$         | \$         | \$         |

13

# Coupling with Non-Financial Data

#### Financial

| Income             | Location<br>A | Location<br>B | Location<br>C |
|--------------------|---------------|---------------|---------------|
| Links data Barrana | <u>,</u>      | <u>,</u>      | <u>,</u>      |
| Light-duty Revenue | \$            | \$            | \$            |
| Medium-duty        |               |               |               |
| Revenue            | \$            | \$            | \$            |
|                    |               |               |               |
| Heavy-duty Revenue | \$            | \$            | \$            |
| Road Service       |               |               |               |
| Revenue            | \$            | \$            | \$            |

| Transport Revenue       | ~             | ~             | ~             |
| Total Income            | х             | x             | x             |
|                         |               |               |               |

## COGS aka Variable Expenses

- Those expenses that go into the creation of revenue
- Every call takes a certain amount of driver's time, fuel, maintenance, tire wear
- As sales increase, so do COGS items and usually along the same percentage, if it takes \$0.08 of fuel to create \$1 of sales, \$1MM of sales will equal \$80K worth of fuel (same 8%)

15

| Cost of Goods Sold  | Loc A     | Loc B     | Loc C   | Total     |

# Call Matrix – the non-financial data

• In order to completely analyze your operations, you need the non-financial data that makes up your operations, the Call Matrix which should be able to be gathered through any GOOD dispatch system

| Calls by Category          | Motor Club | Police | Commercial | Retail/Cash | IAA  | Total |
|----------------------------|------------|--------|------------|-------------|------|-------|
| Light Duty                 | 1992       | 816    | 1899       | 2808        | 8760 | 16275 |
| Light Duty Road Service    | 192        | 3      | 30         | 48          | 0    | 273   |
| Heavy/Medium Duty          | 198        | 45     | 1824       | 639         | 117  | 2823  |
| Heavy duty Road Service    | 12         | 0      | 39         | 24          | 0    | 75    |
|                            |            |        |            |             |      |       |
| Trucking/Hauling/Transport | 0          | 6      | 285        | 39          | 45   | 375   |
| Shop Repairs               | 0          | 0      | 0          | 0           | 0    | 0     |
| Total Number of Invoices   | 2394       | 870    | 4077       | 3558        | 8922 | 19821 |

# Once your financials are readable you can:

- Have a better understanding of your results
- Identify target areas of opportunity in sales and needed cost controls
- Calculate Breakeven sales
- Calculate Price, Cost and Profit per call
- Breakeven call volume
- Develop daily KPI's for minimum and goal-based sales and call volumes
- Build proformas for What-if analyses

25

### Thank you all for coming. Please fill out your survey for Tow Times
